# How to make a dentist smile...

Successful construction of a new dental office begins long before the groundbreaking and the Chambliss & Rabil team is with you every step of the way. We have been building dental offices since 1976 and understand the challenges and opportunities associated with each project.

When you select Chambliss & Rabil, you can rest assured that we are handling the details so you won't have to. We have close relationships with excellent architects, engineers, and interior designers who specialize in dental practice projects. From site selection to final inspection, Chambliss & Rabil will coordinate and manage every aspect of your project so you can focus on what matters most... your practice and your patients.

Southpoint Pediatric Dentistry  
Amy Davidian, DDS, PA  
Durham, NC

Bell Dental  
Jeffrey Bell, DDS  
Clinton, NC

## Design/Build or Renovate

The range of services that we provide our dental clients is limitless. From a minor repair to an update of decor to a full renovation, we handle it all.

**New construction? No problem.** Our knowledge of dental office operations results in an understanding of dental office design, function, and construction. To put it simply, "we speak the language". We know who to engage to form a team that will get it right. Many of our clients prefer that we provide full DESIGN/BUILD services. That way, we are involved from day one. When the architect, engineers, designer, equipment provider and contractor are all in place from start to finish, the result is a better product, a more functional office, a shorter construction schedule, and a lower cost.

That results in a happy dentist. **Mission accomplished.**
